

Waterfront Place is located near the heart of Dundrave Village. Originally the site of a dental clinic, the new building emulates the early Westcoast modern building with its sweeping roof and bold massing. The site is defined by a body of water which transforms into a waterfall as it gently flows down the site toward the beach.

The interior of the building is defined by a curving stairway which connects the commercial office space to the foyer. The building has been recognized by the municipality of West Vancouver for its superb siting and construction.

Location: Dundrave, West Vancouver, B.C.
